

Payment Data Systems

Payment Solutions Provider

Shelby Systems has been in partnership with Payment Data Systems (PDS) since 2006 to manage customers' ACH and Credit Card processing requirements for e-Solutions.

Security & Reliability

PDS continues to hold the distinction as a Level One PCI DSS compliant third party servicer. The company also holds the designations of TPP (Third Party Processor-MasterCard) and TPS (Third Party Servicer – VISA).

In order to keep you from the initial and ongoing expense, labor, and liability of maintaining PCI Compliance, PDS, in concert with Shelby Systems, has created a **PCI DSS compliant** 'Hosted Pay Page'. All data entered via the 'Hosted Pay Page' and our CSR View applications are entered directly onto our secure servers. Since you are not entering, storing, or transmitting cardholder data, you are not required to spend extra money on an ongoing basis to maintain compliance. You simply sign a Self Attestation Questionnaire when you first create your account.

Specialized Reporting

PDS provides specialized reports for all Shelby customers. As an example, reports include enhanced reports for batch and deposit reconciliation, General Ledger capture and reporting and General Ledger Summary.

Customer Service

PDS provides a Customer Service phone number (866-616-5239) and representatives dedicated to serving Shelby Systems customers.

ACH (Check) Processing

With PDS, it costs only \$25 per month to process up to 250 transactions – or just \$.10 per transaction. This is compared to the average of \$1.22 it costs an organization to process a paper check.

Credit/Debit Card Processing

PDS offers special rates for all Shelby Systems users. PDS offers both MOTO/e-Commerce accounts as well as traditional Retail card swipe accounts. If you already have a card swipe terminal and it is PCI compliant, PDS can reprogram it for you. If you need a new terminal we have access to all brand terminals on the market. Whether your needs require a standard dial-up terminal, Ethernet, Wi-Fi or wireless, PDS can accommodate your needs. Please call for terminal quotes.

iRemotePay – iPhone/iPad Application

Accept payments on your iPhone, iPad, or iPad Touch, anywhere....anytime!

It is not always practical or convenient to be tied to a terminal or telephone line in order to process your payments. With iRemotePay's iPhone/iPad application, you will enjoy the freedom to accept CASH, CREDIT CARD, and ACH payments anywhere your business takes you.

"Debit Card Only" Processing

Payment Data's "Debit Card Only" solution is perfect for Faith Based organizations wishing to accept Debit Cards for Online Donations and Event Registrations, but have avoided implementing with the thought of their members incurring credit card debt as a result. Retaining all the benefits of Payment Data's online credit card acceptance, "Debit Card Only" includes the ability to receive Donations and Event Registration only by means of a Debit Card. By using a Debit Card the cardholder can only spend what they have available in their card associated bank account or by the amount of money they have personally loaded onto a pre-paid Debit card. **NO CREDIT CARD = NO INTEREST PENALTIES INCURRED** by the cardholder.

Gateway Processing

Already have a merchant account with another service provider and do not wish to change? You can use your existing merchant account for credit card processing for \$5 per month and \$.15 per transaction. Because PDS has universal connectivity and is certified on all processing networks, your transactions and deposits will be routed to your existing provider. **Note: If you choose to only utilize the PDS Gateway, PDS is unable to offer you the same PCI compliance as with other applications.**

Contact Information

After you have discussed your processing needs with your Shelby representative, you will be referred to a PDS representative to complete your application process. Please feel free to contact your PDS customer service representative at anytime if you have any questions or special processing needs.
