

Fattmerchant ACH Payments

Enabling ACH payments gives your customers more ways to pay, while significantly reducing processing costs and chargebacks.

ACH processing, powered by Fattmerchant, has **NO interchange or markup percentages** associated with the transaction.

Whether collecting or disbursing funds, instead of paying a percentage of the transaction amount as you would with a credit card or other ACH modules, Fattmerchant empowers your business to keep more of your hard-earned profits through a flat monthly subscription.

Fattmerchant offers two funding options for ACH payments:

	Standard	Expedited
Transaction Cost	\$0.25	\$1.50
Processing Deadlines	7:30 pm EST	7:30 pm EST
Funds Availability	5 Days	3 Days

While origination of the ACH payment is enabled on each day of the week, settlement of the funding mostly occurs Monday through Friday. Saturday deposits are available, but are dependent on the financial institution.

Empower Your Business with ACH Payments

↓ Cost Reduction

Ditch the interchange fees and extra percentages. With Fattmerchant's flat-rate subscription model, you pay a low monthly membership in exchange for one-time transaction fees, no matter how large the transaction.

↔ Robust Functionality

Whether the payment is collected online, over the phone, or in-person, you can initiate one-time billing, recurring billing, and set up notifications.

⚙️ Optimized Processes

Automatic account correction ensures accuracy in every transaction. Cloud reporting allows visibility into those transactions anywhere, anytime.

🛡️ Leading Security

All payments are tokenized with encryption all the way through settlement, and are fully compliant with PCI Standards.
